

Fund Overview

The *STF Tactical Growth ETF* is an actively managed fund that seeks long-term growth of capital with downside mitigation.

The Model: The Fund's Adviser employs a series of trend following, volatility, and momentum metrics to determine the appropriate equity exposure to the NASDAQ-100 index. Treasury bond and bill exposure is determined based on uncorrelated returns to the NASDAQ-100.

The Strategy: TUG seeks to reduce equity exposure in bearish market environments while remaining invested during bullish market environments. The ETF vehicle allows for tax efficient pivots between equities and bonds.

TUG may help investors:

- Solve the challenges of asset allocation by remaining fully invested in all market cycles
- Replace or augment a traditional stock and bond portfolio
- Eliminate emotion from the investment process with systematic, data-driven risk management

Fund Details

All-in-one portfolio solution in a packaged product offering tax and cost efficiencies associated with an ETF.

Performance

	3 MONTH	6 MONTH	YTD	1 YEAR	3 YEAR	5 YEAR	10 YEAR	INCEPTION
NAV	14.63%	5.06%	14.63%	--	--	--	--	0.43%
Market Price	14.62%	5.00%	14.62%	--	--	--	--	0.20%
Benchmark	15.25%	15.99%	15.25%	--	--	--	--	8.05%

Total Expense Ratio for the Fund is 0.65%. The performance data quoted represents past performance and is no guarantee of future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For performance current to the most recent month end visit stfm.com/etf/tug.

Net Asset Value (NAV) is the dollar value of a single share based on the value of the underlying assets of the fund minus its liabilities, divided by the number of shares outstanding. Calculated each business day. Market Price is the current price at which shares are bought and sold. Market returns are based upon the last trade price.

The 30-Day SEC Yield is computed under an SEC standardized formula based on net income earned over the past 30 days.

Distribution yield is calculated by annualizing the most recent distribution and dividing by the most recent fund NAV. The yield represents a single distribution from the fund and does not represent total return of the fund.

Benchmark is a blended return of 70% NASDAQ 100 Total Return (XNDX) and 30% Bloomberg US Aggregate Bond Index (LBUSTRUU).

Duration is a measure of the sensitivity of an asset price to movements in yields.

Correlation is a measure of the relationship between the prices of different assets.

Important Information

Must be preceded or accompanied by a prospectus.

Investing in ETFs involves risk and there is no guarantee of principal.

Because the Fund is an ETF (rather than a mutual fund), shares are bought and sold at market price (not NAV), may trade at a discount or premium to NAV and are not individually redeemable. Owners of shares may acquire those shares from the Fund and tender those shares for redemption to the Fund in Creation Unit aggregations only. Brokerage commissions will reduce returns.

Cash Redemption Risk. The Fund's investment strategy may, at times, require it to redeem shares for cash or to otherwise include cash as part of its redemption proceeds. In that case, the Fund may be required to sell or unwind portfolio investments to obtain the cash needed, which may cause the Fund to recognize a capital gain that it might not have recognized if it had made a redemption in kind. **Fixed Income Risk.** Fixed income investments are subject to changes in governmental policy and market conditions, which may cause such investments to be subject to significant volatility and reduced liquidity, depending on the environment. **Fixed Income - Call Risk.** During periods of falling interest rates, an issue of a callable bond held by the Fund may call or repay the security before maturity, causing the Fund to reinvest proceeds at a lower interest rate. **Fixed Income - Credit Risk.** Debt issuers and other counter-parties may not honor their obligations or have their debt downgraded by ratings agencies. **Fixed Income - Extension Risk.** During periods of rising interest rates, certain debt obligations will be paid off more slowly than anticipated, causing the value of those securities to fall. This may result in a decline in the Fund's income and potential the value of the Fund's investments. **Fixed Income - Interest Rate Risk.** Rising interest rates may cause the value of fixed-income securities held by the Fund to decline.

Large-Capitalization Investing Risk. The securities or large capitalization companies may be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion. **Management Risk.** The Fund is actively managed and may not meet its investment objective based on the Adviser's success or failure in implementing the Fund's strategy. **Models and Data Risk.** When models and data prove to be incorrect or incomplete, decisions made based on them can expose the Fund to potential risks. **New Fund Risk.** The Fund is recently organized with no operating history and managed by an Adviser that has not previously managed a registered fund. As such, the Fund has no track record on which to base investment decisions. **Non-Diversification Risk.** Because the Fund is "non-diversified," it may invest a greater percentage of its assets in securities of a single issuer or fewer issuers than a diversified fund, which may expose the Fund to the risks associated with the developments affecting the issuers in which the Fund invests. **Other Investment Company Risk.** By investing in another investment company, including ETFs, the Fund becomes a shareholder of that investment company and bears its proportionate share of the fees and expenses of that investment company. In addition, the Fund is also subject to the principal risks of the investment companies in which it invests **U.S. Treasury Obligations Risk.** Changes to the financial condition or credit rating of the U.S. government may cause the value of the Fund's U.S. Treasury obligations to decline.

The NASDAQ 100 Index is a basket of the 100 largest, most actively traded U.S. companies listed on the NASDAQ stock exchange. The index includes companies from various industries except for the financial industry, like commercial and investment banks. These non-financial sectors include retail, biotechnology, industrial, technology, health care, and others. Indexes cannot be invested in directly.

STF Management, LP serves as the Fund's investment adviser.

The Fund is distributed by Foreside Fund Services, LLC.
